

Week beginning May 8th 2017

Thankyou Eliot for sharing your magnificent volcano with us and demonstrating how it erupts. It was very impressive and the children were amazed.

This week some children have been wearing a watch so we have made clocks and told the time using the terms o'clock and half-past. We have also begun to count in groups of two.

Watch out, watch out, there's a giant about. The children have noticed giant footprints and hand prints in our playground. I wonder where they came from.

Rowan are very busy practising and making props for their Assembly

Special Notices

On Thursday work will begin on improving our outdoor area. Children will play in the main playground with their mid-day supervisors and their Buddies.
